Alexander Dubovskoy
Drupal Solution Architect

Profile:

Drupal developer with 13+ years experience. I've started from drupal 5, but last 3 years I am mostly working with drupal 8/9 projects.
I provide a full cycle development including analysis, research, design, programming, testing, maintenance and support with proficiency in Drupal, Symfony, VueJS, SvelteJS, Git, Linux & Docker.
I am looking for projects to apply my knowledges and leadership skills as Drupal/Symfony architect.

I have an upper-intermediate level of speaking English and currently living in Montenegro.

Employment history:

RaDon, 2007-2021

As a co-founder, I've built a regional drupal web company. My responsibilities are organizing full infrastructure workflow, team-leading, code and quality control and ownership of drupal hosting.
In the position of Drupal Solution Architect, I have been working already for 13 years and have large experience in team-leading up to 10 middle drupal developers.

SystemSeed, 2021-present

As a developer, I've built services with significant social impact for international organizations WHO & UNICEF, Concern WorldWide.

Key achievements:

— Built CI/CD solutions for 100% company products.

— Wrote own self-hosted drupal-based CRM system for hosting clients. Now more than 7000 clients are using system for tickets / new support tasks, invoices and statistic reports.

— Built standard onboarding solution for development team which based on Docker 4 Drupal docker repository & Symfony console.

— Prepared and updated tests regarding Drupal Standards for new hired developers.

— Built 4 different Drupal distributions: for e-commerce, stand-alone landing-pages, online conferences and LMS. For now there are more than 1200 installations.

Drupal/PHP community interactions

I am taking part and organazing all drupal meetups and conferences in Russia and CIS (Moscow, Rostov-on-Don, St. Petersburg, Krasnodar, Minsk, etc.) and actively participating in PHP promotion in IT community (IT-conferences, lectures, podcasts, etc.).
